in the aerospace sector

Preparing the Future of Aeronautics

AEROSPACE VALLEY: SUPPORTING INNOVATION

The global cluster for aerospace based in Toulouse represents the largest European labor pool in aeronautics and space. The team is dedicated to fostering innovation:

- The Aerospace Valley has supported the funding of **590+ R&D projects** which represent **1.5B€**.
- The team supports French and European projects **CleanSky**, **H2020**, **Horizon Europe**.
- The cluster can connect you to 10,000 contacts, and organize **130+** events per year.

TOULOUSE AEROSPACE: A PLACE FOR EXCELLENCE

Toulouse is involved in leading projects:

- 💡 **Energy-efficient aircraft:** more electric, new materials, green propulsion
- 💡 **Intelligent aircraft:** more connected, SPO
- 💡 **Smart manufacturing**

Research and laboratories directly supporting aerospace:

ONERA the national aerospace laboratory; the **IRT St-Exupéry** research institute; CIRIMAT; Laplace; CRITT.

Engineering schools (130,000 students annually) are a pool of talents for companies:

ENAC the French school for pilots and air traffic control.

ISAE - SUPAERO world leader in aerospace engineering.

ENSEEIH electronics, mechanics and telecom engineering.

INP-ENSIACET chemical, material, and industrial engineering.

ADDITIONAL POTENTIAL INTERACTIONS

Toulouse also fosters other kinds of innovation, which enables cross-fertilization in:

IoT

Health and
biotechnologies

Artificial
intelligence

Autonomous
transportation

DID YOU KNOW

- The **EGNOS** signal is operated from Toulouse through ESSP to guarantee aircraft positioning.
- You can ask the **FRACS** - expertise and consultancy office of the French civil aviation, located in Toulouse - for support in the fields of regulation, safety oversight and air navigation.
- From Clément Ader's experimentations done in the 1890's, the word "**avion**" was created.
- The first airline worldwide was the Latécoère "**Aeropostale**" airmail to connect Toulouse, Casablanca, Dakar and South America.

How We Can Help

FREE AND CONFIDENTIAL SUPPORT

Information on Toulouse:

- Provision of viable economic information, including **incentives**
- Information on French companies, tax, and labor laws
- Organization of a **2-day educational** tour in order to meet potential local partners and clusters to create **business opportunities**

Set-up support:

- Site-selection, including **soft-landing** solutions
- Local recruiting support
- Guidance over public and private funding

ESTATE OPTIONS

Toulouse Aerospace: a new center for excellence in aerospace

- Toulouse Aerospace is a new 56-hectare district dedicated to innovation in aerospace and embedded systems, surrounded by universities and a strong industrial ecosystem.
- Since March 2018, the B612 Innovation Center has hosted the IRT research Institute and the Aerospace Valley cluster as well as many innovative companies.
- “**La Cité des Start-up**”, the largest home for start-ups in Toulouse.
- Various programs can support your project: Cockpit Business acceleration, Airbus BizLab, District program, Nubbo, CEA tech.
